

PC **ArcView 3.x**
Software:

Description

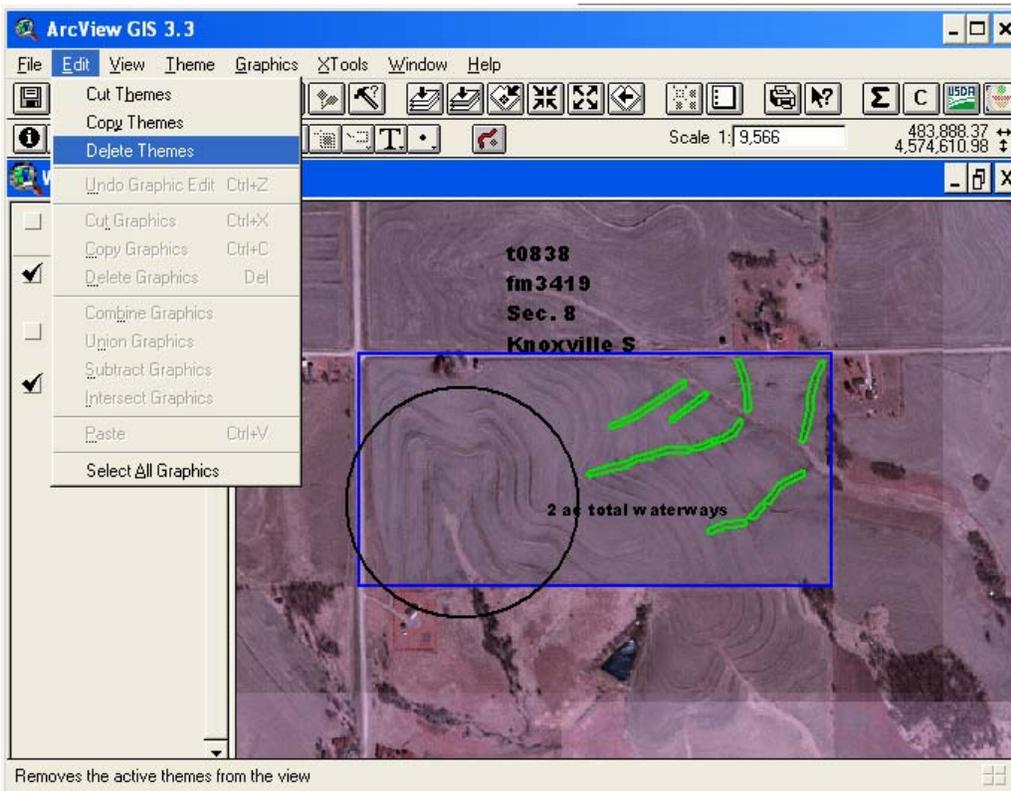

Instructions on using a copy of the FSA Common Land Unit data in the customer's ArcView project for the purpose of improving the speed in which you are able to access the data. The following process will only need to be done for the customer projects containing the data "clu_a_ia***.shp" (***) represents the three digit county FIPs number).

Instructions

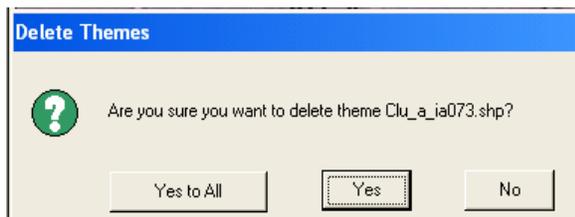

- 1) Using Toolkit, open a customer's ArcView project file (*.apr).
- 2) In View1 make the Clu_a_ia***.shp theme active (this is done by clicking once on the name of the file in the view legend).

3) Click on the 'Edit' menu, choose 'Delete Theme'.

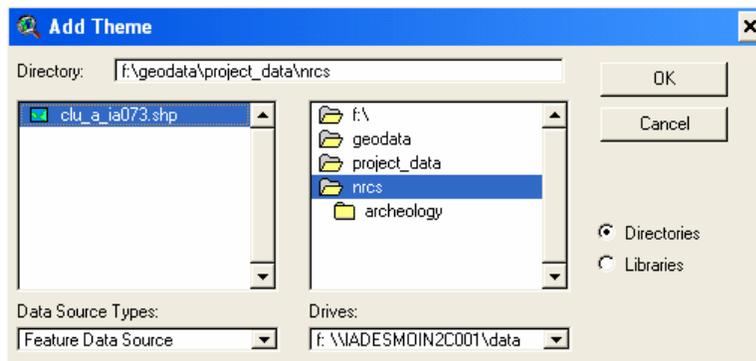

4) When prompted "Are you sure you want to delete...", click 'Yes'.

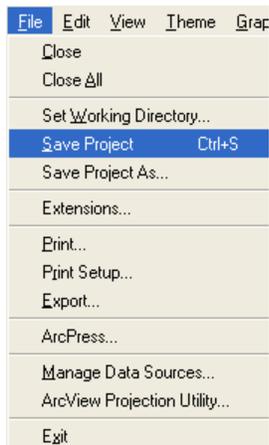

5) Click the 'View' menu, choose 'Add Theme'.

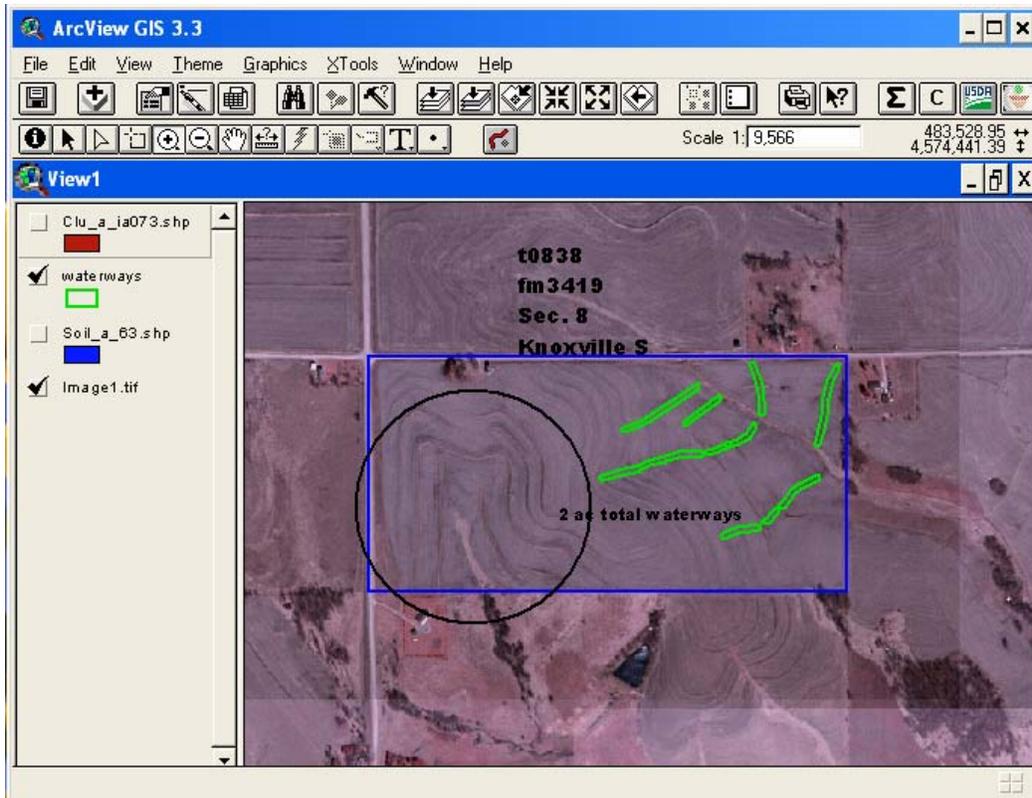

6) Navigate to the f:\geodata\project_data\nrcs folder, select the file called "clu_a_ia***.shp", click 'OK'.

7) Save the project by clicking on the 'File' menu, choose 'Save Project'.

Pictured above is the project with the new file saved in it.
